ENERGY
REGULATORY COMMISSION

6/22/2019

Susan Manning
12895 Callae Dr
Conifer, CO, 80433-5900

Dear Secretary,

We have to move toward environmem-friendly practices. If we don't the world will not be fit for human or animal survival by 2050. This means impact on your children, too! Please do the right thing and stop supporting fossil fuels!

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need. By accepting such "affiliate agreements", FERC is spurring the gross overbuilding of gas pipelines, driving up the rate of fracking and exacerbating the threat to public health and safety along the entire supply chain: from the wells that poison our air and drinking water to our rivers, streams, and shorelines eroding from runoff and accelerating climate change-induced sea level rise.

Meanwhile, customers are paying higher utility bills while utilities and other corporate polluters reap profits from guaranteed rates of return for pipelines that aren't even needed. FERC should determine need based on independent, regionally-focused assessments to avoid undue pipeline redundancy and the resulting greenhouse gas pollution that in some instances directly contravenes regional environmental goals. . FERC should also give due consideration to cleaner, safer, and more affordable alternatives to fracked gas pipelines and power plants, such as renewables and demand-side energy efficiency.

Sincerely,

Susan Manning

Dear Secretary,

Remember "climate change" ?? While the powers that be constantly hedge on subsidizing the poor, health care for all, any and all programs that benefit the American taxpayer; subsidizing the oil, gas, coal, lumber, cattle, ranchers and every tax evader seems just fine for this administration in spite of NEEDING to address this major global crisis called climate change to which all this industries contribute. For this, I am disgusted by the hypocrisy and theft of the American people.

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need.
