REGULATORY COMMISSION

Dear Secretary,

Anyone who who pollutes the planet should not profit.

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need. By accepting such "affiliate agreements", FERC is spurring the gross overbuilding of gas pipelines, driving up the rate of fracking and exacerbating the threat to public health and safety along the entire supply chain: from the wells that poison our air and drinking water to our rivers, streams, and shorelines eroding from runoff and accelerating climate change-induced sea level rise.

Meanwhile, customers are paying higher utility bills while utilities and other corporate polluters reap profits from guaranteed rates of return for pipelines that aren't even needed. FERC should determine need based on independent, regionally-focused assessments to avoid undue pipeline redundancy and the resulting greenhouse gas pollution that in some instances directly contravenes regional environmental goals. . FERC should also give due consideration to cleaner, safer, and more affordable alternatives to fracked gas pipelines and power plants, such as renewables and demand-side energy efficiency.

Sincerely,

Jessica Mitchellshihabi

Dear Secretary,

I was quite surprised to learn of this large and generous profit margin guaranteed by my and other US tax paying citizens. In my own business I would be happy to receive a 5 percentage guarantee This seems outrageous given the multiple other stronger needs of tax dollars from health care needs of children, and low income adults, infrastructure of roads, housing for homeless etc. Are you giving similar profit guarantee margins to non green house producing energy. This is government run amok !

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need. By accepting such "affiliate agreements", FERC is *spurring the gross overbuilding of gas pipelines, driving up the rate of* fracking and exacerbating the threat to public health and safety along the entire supply chain: from the wells that poison our air and drinking water to our rivers, streams, and shorelines eroding from runoff and accelerating climate change-induced sea level rise.

Meanwhile, customers are paying higher utility bills while utilities and other corporate polluters reap profits from guaranteed rates of return for pipelines that aren't even needed. Dear Secretary,

It is absurd that the best science strongly indicates that we should cease using fossil fuels and encourage renewable energy, but our government is still handing out money to encourage fossil fuel extraction. The only explanation is the government is in the pocket of extremely wealthy fossil fuel barons. This is corruption and has to stop immediately.

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need. Dear Secretary,

Oppose runaway profits for dirty, dangerous, unnecessary fossil fuels! It encourages more fracking and a massive overbuilding of pipelines that destroy our lands, communities, and waters and inflates our utility bills to line utility CEO's pockets!

FERC must stop its business as usual approach to allowing self-dealing by fracked gas companies and their affiliates as a means of measuring public need. This self-dealing consists of a company effectively contracting to buy the gas from itself and claiming the contract as proof of public need.
